Education

ENSIMAG - Top-ranked French CS Engineering School

Graduation: June 2026

B.Sc & M.Sc. in Computer Science – Specialization: Information Systems and Software Engineering

Grenoble, France

- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Databases, Distributed Systems, Web Development, Computer Architecture, Compilers, Cybersecurity

Work Experience

Founding Software Engineer Intern

May 2025 – Present

Noticeable

Panama City, Panama

- Delivered complete microservices-based infrastructure for a YC-preparing startup using Python, Redis, Docker and AWS, enabling **first live prototype within 3 weeks**.
- Designed a **scalable and fault-tolerant backend system**, supporting +3 async workflows, optimized for modularity and low latency.
- Drove tech roadmap and system design, **collaborating daily** with founders and leading architectural decisions in a zero-legacy, high-autonomy context.

Software Engineer (Contract)

May 2024 – Present

Eosya

Remote

- Built full backend architecture **from scratch** using Django, PostgreSQL and Docker, powering a production-ready platform for exploring and searching outdoor sport activities.
- Implemented **ultra-fast full-text autocomplete** over **800k+ entries** using Elasticsearch and Redis, reducing latency **from 7s to 250ms** (28x) ensuring smooth user experience.
- Led frontend development in Angular to support user search, filtering and visualization of points of interest.
- **Enabled zero-downtime deployments** across 3 environments using robust CI/CD (GitLab) and Dockerized environments.

Projects

Aleo Hackathon Winner - \$100,000 Prize

Web3 | Aleo (Rust like) | TypeScript

- Won **1st place** in global Web3 hackathon (250+ teams) co-hosted by Aleo and zSociety.
- Built a decentralized oracle feed with ZK-Proof infrastructure and custom SDK for smart contract interactions.
- Led frontend and SDK architecture, with strong performance focus and live demo deployment.

Nsigma (Student Organization)

React Native | Expo | CI/CD

- Created a mobile app enabling **200+** students to browse and apply for tailored missions in real time leveraging push notifications.
- Overhauled internal infrastructure (CI/CD, Docker, CDN, automated backups), improving frontend performance by **85%** and ensuring reliability for **500+ monthly active users**.

Leadership

Chief Information Officer (CIO) | Nsigma Junior Enterprise

March 2024 – March 2025

- Managed a team of 4+ students to develop internal tools that improved mission finding and tracking.
- Led the deployment of a retrieval system to support legal decision-making and collaborated with leadership to plan scaling to 25,000+ students nationwide.

Technical Skills

Programming Languages: Python, Java, TypeScript, JavaScript, C, SQL, Bash, HTML, CSS

Frameworks & Libraries: Flask, Django, React, Angular, LangChain, Postgres

Tools: Git, GitHub, Docker, AWS, Nginx, Redis, Elasticsearch

Concepts: Backend Development, FullStack Development, Software Engineering, Software Development

Networking: CI/CD, Microservices, DevOps, Automation, Agile, System Design, Infrastructure Engineering
